ENVIROGOLD STRENGTHENS MANAGEMENT IN DOMINICAN REPUBLIC GENERAL MANAGER AND OPERATIONS MANAGER APPOINTED

Australian-based mineral resources company, **EnviroGold Limited (ASX: EVG)** (**EnviroGold** or the "**Company**") advises it has strengthened management for its operations in the Dominican Republic, by the appointment of:

FRANZ ULLOA as General Manager; and
ERNESTO CASTILLO as Operations Manager

Mr Ulloa holds a Bachelor Degree in Geology from the University of Costa Rica and a Master in Mineral Economics from the Colorado School of Mines in Denver.

Since 1995, Mr Ulloa has acted as Country Manager in Costa Rica for Canadian companies, including Placer Dome Inc, managing mid-sized gold mining operations with up to 400 employees. Over the previous 12 years, he managed significant exploration programs for US companies, including Phelps Dodge.

Mr Ulloa will have ultimate responsibility for profitable operation of EnviroGold's Las Lagunas gold tailings project, overseeing exploration activities and feasibility studies on the La Yagua, La Pacionca and Fuerte concessions, and for administration and Government relations.

Mr Castillo holds a Degree in Engineering specialising in Chemistry and Metallurgy, from the National University of St Augustin in Peru.

Since 1980, Mr Castillo's career has been focussed on supervision of operations for large-scale (100,000 tpd) copper/gold concentrators for companies such as Southern Peru Copper Corporation and the Hothschild Group, in Peru.

Mr Castillo will be responsible for the operation of the Las Lagunas Albion/CIL process plant where his extensive experience should be invaluable in optimising gold grade in flotation concentrates, prior to their feed to the plant.

Mr Brian Johnson, Executive Chairman of EnviroGold Limited, said interviews were being conducted in order to appoint a CEO to be based in Canada, and a General Manager in Ecuador, both with a mining background and experience in Latin America. The Dominican appointments, together with those proposed, should allow the Company to meet its near-term objectives.
